X2 is a registered trademark of Fx Simulation (UK) Ltd.

Printed in the UK

cinema, arcade and theme park.

riders as they view the on-going ride on the display screen. Safety barriers set up a safe perimeter around the simulator making it suitable for any mall, for everyone. Suitable for any indoor location, its immediate presence quickly catches your eye. The external kiosk displays the capsule interior and tempts displayed on a High Definition 32" LCD display. The selection of rides delivers a wide appeal to audiences of all ages - offering an exhilarating new experience, innovative design brings 4D effects into the realm of two seater simulators. The wind blast, heat flash and thunder FX will immerse you into 8 exciting rides,

The X2 Motion Simulator is like nothing you have ever seen before.

Born to Ride

Just look at the X2 and its styling gives you clues that it's something different – which instantly makes you curious about its other features. Inside variable speed fans create a Wind Blast effect, enhancing the illusion of exhilarating speed. The 8 rides which are displayed on a High Definition LCD screen can be easily changed due to the X2's USB ride key system, another factor which suggests this is no ordinary simulator. Powered by the hydraulic motion base, the capsule weaves masterfully and in symphony with the ride visuals. The smooth movements of the X2 are the result of unparalleled engineering and manufacture standards, consistent throughout production. The experience is so involving, that you feel like you really are soaring through space or down an abandoned mine.

**Dual Money Acceptors**  
Dual money acceptors, available with coin and note acceptors to offer flexibility at any location.

**32" High Definition LCD Display**  
The visual quality of the rides displayed on this high definition screen is incredible.

**Internal Capsule Camera**  
Let the gathering crowds become inspired by the enjoyment on the faces of those inside.

All these features combine to make the X2 exhilarating for customers to ride and rewarding for operators to own.
